We've recently decided to retire LastPass. Instead we've adopted FeeX. FeeX is a service rebel uses that provides the technology for advisors to manage 401(k)s accounts on behalf of their clients as part of their overall portfolio without taking custody of the accounts. This allows advisors and investors to work together on a personalized, holistic plan.

*We will be transitioning to FeeX during spring 2022 and after implementation, we will no longer support LastPass. While FeeX will be superior in many ways and was only available to silver and gold clients, it will now be available to all clients and assets managed will be at our normal fee schedule.

Studies show that actively managed 401(k)'s generate 3.3% higher returns per year, net of fees, than accounts without active management. This compounding effect yields up to 76% more wealth over 20 years. * FeeX, FeeX, www.feex.com/. Accessed 7 Sept. 2021.

DIGITAL ASSETS

ENHANCED PORTFOLIOS

Crypto currency, which should actually be called Digital Assets, are becoming an increasingly important asset class based on the technology of blockchain. Many important industry experts and scholars believe they will become one of most important technological/financial advances of the early 21st century. Additionally, early research and application are demonstrating that Digital Assets may be one of the most important parts of your portfolio's growth over the next 10-25 years. rebel Financial is taking a proactive stance in modern portfolio design by creating portfolios with small allocations to Digital Assets which can potentially increase rate of return by ~0.5% - 2%/year while minimizing overall downside risk through research and disciplined rebalancing. While these assets can be very volatile, we believe that they offer our clients the potential for increased return at a superior risk-to-return ratio. Ask your advisor if you are interested in learning more or utilizing our new Digital Asset Enhanced Portfolios.
